

DESKTOPIA

FLICKING GAME

*A tactical
flicking game*

Components

- 54 wooden discs
- 72 cards
- Stickers
- Rules

Desktopia is a fascinating game that requires good planning, physical coordination and a good eye. It has mighty warriors, mysterious artifacts and deadly missiles. They are represented by disks of varying sizes and colors that have to be sent flying toward their targets with a well-aimed flick of a finger. Choose a side of the table and lead your Order's army into a campaign of world conquest.

Desktopia games can vary substantially. The battlefield landscape is formed by the random conglomeration of objects that can usually be found on your desk or table. These may include books, cups, your laptop, a mouse or a remote control.

The game pack includes a set of riveting scenarios. You can take part in a massive melee, rob caravans, perform speed missions under a hail of arrows and even solve riddles!
